## an international journal

Volume 143

GIORGIO BUSONI AND SERENA MATUCCI (Firenze, Italy)
A Problem of Optimal Harvesting Policy in Two-Stage Age-Dependent Populations . . . . . 1

R. WEBSTER WEST (Columbia, South Carolina) AND JAMES R. THOMPSON (Houston, Texas)
Modeling the Impact of HIV on the Spread of Tuberculosis in the United States . . . . . 35

ALESSANDRO BERTUZZI, ALBERTO GANDOLFI, CARMELA SINISGALLI, AND DANIELA IACOVIELLO (Rome, Italy)
Steel's Potential Doubling Time and Its Estimation in Cell Populations Affected by Nonuniform Cell Loss . . . . . 61

A. S. HURN (Oxford, England), K. A. LINDSAY (Glasgow, Scotland), AND C. A. MICHIE (London, England)
Modeling the Lifespan of Human T Lymphocyte Subsets . . . . . 91

R. G. STAUDTE, R. M. HUGGINS, J. ZHANG (Victoria, Australia), D. E. AXELROD (Piscataway, New Jersey), AND M. KIMMEL (Houston, Texas)
Estimating Clonal Heterogeneity and Interexperiment Variability with the Bifurcating Autoregressive Model for Cell Lineage Data . . . . . 103
